Dentistry, medicine, science and pharmacology are continually evolving—it's essential to keep your skills and knowledge fresh. Adult Oral Conscious Sedation Recertification can help you stay abreast to ensure that you are providing your patients with the most up-to-date, comprehensive care available. That's why we recommend that all dentists participate in our recertification course at least once every two years. In addition to fulfilling continuing education requirements, this one-day course will cover the newest studies and research available, as well as updates on adult oral conscious sedation protocols. You will review the critical psychology of the sedation patient, expand on your knowledge of sedation pharmacology, and practice airway management and monitoring.

Course Objectives:

- Methods to increase or decrease the level of sedation on demand
- Refresher on key airway management techniques
- Advanced treatment planning
- Patient selection and patient assessment
- Review of pharmacokinetics and pharmacodynamics to help you choose the best drug(s) and protocols to meet your patients' needs
- Simple, yet mandatory, dismissal criteria which will reduce your worry and ensure patient safety
